Gateway to your healthcare career

Get valuable work experience through curricular practical training (CPT) and optional practical training (OPT) opportunities through UAB affiliates such as Southern Research, the first science research center in the southeast, whose anticancer research has resulted in seven FDA-approved drugs and several notable chemotherapy advances.

As a thriving entrepreneurial and tech center with a strong healthcare economy, Birmingham is the perfect location to start your career at the intersection of healthcare, business and new technology. Find work and internships in top, high-paying healthcare positions through your UAB network.

“ Studying in such a diversified culture made my transition into the working environment really smooth. The highlight of my degree has been the internship project offered by UAB in the summer of 2020 where I was able to determine the spread of Covid-19 according to the mobility of the community in the States of Georgia and Mississippi. I loved working as a Student Assistant for ISSS.”
